Hi Mary Sue,  
I'm forwarding this to you to see if this email could be on the agenda for next Monday?  
Thanks, Kim

**Subject:** Recreational ATV, UTV, Golf Cart use on City Streets

Gentlemen,  
Just wanted to see if this is possible:  
Code 75.03: Would there be a possibility you could have a discussion to designate all City Streets can be used as long as the ATV/UTV is registered with the DNR and the owners have liability insurance? All operators must have a valid drivers license. These vehicle's must have working headlight, tail/stop lights during night time hours. Could this item be discussed at your next Counsel Meeting?

With the Taxpayers paying for the UTV's and their operation on the City streets for the School, Fire Dept. and Street Dept. then why not let the city residents have the same usage?

Compared to full sized cars and trucks, these vehicle's are very economical on fuel, take up a fraction of parking space and are very easy to enter and exit, especially for our senior population.

All of these vehicle's with a snowplow running up and down the streets are a welcome site after a snowstorm.

Feel free to call me anytime to discuss...  
Thank you for your time.

Kim Harris
