

Mary Sue,

Please see the attached updated scope of services and fee proposal for updating The City of Earlham's Comprehensive Plan. Based on the feedback you provided from City Council we have reduced the scope and fee from the original proposal. The revised scope is an update to the Land Use Planning Chapter of the City's Comprehensive Plan. It will include an analysis of the existing land use map and zoning map along with input from the community to recommend updated land use mapping, zoning mapping, implementation actions, and roadway and utilities infrastructure planning.

Confluence and Shive-Hattery would be happy to attend an evening meeting with the Comprehensive Planning Committee to discuss the proposal and deliverables if that would help them with their decision making.

Best Regards,

Tami L. Wilcox, P.E.
